JEFFREY P. COOPER-SMITH

*The United States Botanic Garden informs visitors about the aesthetic, cultural, economic, therapeutic, and ecological importance of plants to the well-being of humankind.*

The U.S. Botanic Garden carries out its mission by presenting artistic displays of plants, exhibits, and a program of educational activities; promoting botanical knowledge through the cultivation of an ordered collection of plants; fostering plant conservation by acting as a repository for endangered species; and growing plants for the beautification of the Capitol complex. Uniquely situated at the heart of the U.S. Government, the Botanic Garden seeks to promote the exchange of ideas and information relevant to this mission among national and international visitors and policymakers.

The Conservatory, one of the largest structures of its kind in this country, features both indoor exhibits and two outdoor courtyard gardens. Collections in this facility attract many visitors annually, including botanists, horticulturists, ecologists, students, and garden club members. The permanent collections include orchids, epiphytes, bromeliads, carnivorous plants, ferns, cycads, cacti, succulents, medicinal plants, rare and endangered plants, and plants valued as sources of food, beverages, fibers, and other industrial products. Specialty exhibits range from artwork inspired by plants to seasonal

flower shows highlighting the beauty of chrysanthemums, poinsettias, spring flowers, and attractive summer terrace arrangements.

Outdoor plantings are showcased in Bartholdi Park. Also located in this park is Bartholdi Fountain, created by Frederic-Auguste Bartholdi (1834–1904), sculptor of the Statue of Liberty. To the west of the Conservatory, a rose garden marks the border of a 3-acre tract that is the future site of the National Garden.

The Botanic Garden offers educational facilities by making available for study to students, botanists, and floriculturists many rare and interesting botanical specimens. Every year botanical specimens are received from all over the world with requests for identification, and one of the services rendered by the Garden to the public is the identification of such specimens and the furnishing of information relating to the proper methods of growing them.

The U.S. Botanic Garden was founded in 1820 under the auspices of the Columbian Institute for the Promotion of Arts and Sciences, an organization that was the outgrowth of an association known as the Metropolitan Society and that received its charter from Congress on April 20, 1818. The Garden continued under the direction of this Institute until 1837, when the Institute ceased to exist as an active organization.

The Botanic Garden remained abandoned until 1842, when it became necessary for the Government to provide accommodations for the botanical collections brought to Washington, DC, from the South Seas by the U.S. Exploring Expedition of 1838–42, under the leadership of Capt. Charles Wilkes.

The collections were placed temporarily on exhibition at the Patent Office upon return of the expedition in June 1842.

The first greenhouse for this purpose was constructed in 1842 on a lot behind the Patent Office Building under the direction and control of the Joint Committee of Congress on the Library, from funds appropriated by Congress.

The act of May 15, 1850 (9 Stat. 427), provided for the relocation of the Botanic Garden under the direction of the Joint Committee on the Library. The site selected was on The Mall at the west end of the Capitol Grounds, practically the same site the Garden occupied during the period it functioned under the Columbia Institute. This site was later enlarged, and the main area continued to serve as the principal Botanic Garden site from 1850 to 1933, when the Garden was relocated to its present site.

Although the Botanic Garden began functioning as a Government-owned institution in 1842, the records indicate that it was not until 1856 that the maintenance of the Garden was specifically placed under the direction of the Joint Committee on the Library and a regular, annual appropriation was provided by Congress (11 Stat. 104).

At the present time the Joint Committee exercises its supervision through the Architect of the Capitol, who has been serving as Acting Director since 1934.

The Botanic Garden's Conservatory closed to the public on September 2, 1997, for major renovations. It is expected to reopen in the year 2000. Bartholdi Park is open from 9 a.m. to 5 p.m. daily.
